NEW!

coreflon

PTFE SURGICAL SUTURE

DESCRIPTION

- New Non-porous smooth d-PTE material.
- Will not absorb blood, saliva, bacteria and food residue.
- d-PTE material is more flexible thereby adapts to tissue volume changes during healing.
- White thread and black needle ensures excellent visibility in the surgical field.
- Needles are manufactured from an exotic metal alloy; resulting in a hard, razor-sharp edge.

NEEDLE SIZE CHART

Needle	Length	Shape	3/0	4/0	5/0	6/0
DS 1/2 circle Taper Cut	13mm					19005
	16mm		19000	19002	19004	
	19mm		19001	19003		

CLINICAL COMMENTS:

"Coreflon suture does not coil or tangle, sutures are flexible and do not cause tissue tension. Coreflon suture does not irritate soft tissue, does not cause inflammatory reactions, mucous membrane heals quickly and does not leave scars."
Dr n, med. Ziemowit Franaszek
Poland

"After one year of documented cases, I can only say this is the suture for "no failures" in everyday practice. Innovative, strong and "fancy" needle (especially the black one) with reliable mounting and versatile use."
Dr. Alecsandru Ionescu, DDS
Bucharest, Romania

"Coreflon supports tissues very well, does not loosen, increases patient comfort and reduces physical discomfort of removal the stitches to a minimum."
Jaroslav Pospiech DDS, PhD
Poland

"I am delighted with excellent properties of Coreflon, especially thread's ability to stretch and to return to its original shape."
Mario Kirste DDS, PhD
Germany
