## CARBIDE SURGICAL BURS

**“Sterile Surgical burs Reduce Reprocessing Tracking Time”**

### FAST CUTTING

Sectioning teeth into manageable components can be done quickly using SS White burs.

### LESS CLOGGING

Bone removal and discharge of material is done efficiently due to SS White's unique blade geometry.

## GLYCOLON SUTURE

### Resorba Glycolon Absorbable Monofilament Sutures

Glycolon™ is Resorba's® top selling suture material world-wide and is made of polyglycolic acid (PGA) and polycaprolactone (PCL). The monofilament structure provides excellent handling properties, does not wick bacteria, and allows for atraumatic passage through the tissue. Glycolon™ maintains 50% of its tensile strength for 11-13 days
